(54) Title: **PATIENT ACTIVITY MONITOR**

(57) Abstract: A patient activity monitoring system (100) that allows caregivers of multiple patients to work more efficiently and with reduced cost, while increasing the quality and level of patient care. The system includes a plurality of remote monitoring subsystems (104), a plurality of user notification units (106), and a central monitoring unit (102) with a Graphical User Interface (118) (GUI) communicably coupled between the remote monitoring and user notification units. Each remote monitoring subsystem (104) includes a remote monitoring unit (108), and a sensor device (110) associated with a respective patient that detects one or more activity and/or physiological parameters of the patient. A simplified user interface including the GUI and the user notification units (106) provides indications of the type and level of assistance required by one or more patients to caregivers at centralized and remote locations.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/33248

A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : G08B 23/00

US CL : 340/573.1

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 340/573.1, 573.3, 573.4; 600/300

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"B" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"

document member of the same patent family
